# SUCCESS STORY

**Meezan Bank**  
The Premier Islamic Bank

Meezan Bank came up with a problem statement to which we had the perfect solution. It was to track the non-financial growth of the salesforce as there was minimum record of their efforts.

UHF Solutions offered a BDO Sales App to solve their obstacles. It helped them in monitoring, their non-financial goals by automating their entire sales journey and empowered the salesforce to generate more revenues.

It was a 60 days POC to start off and we achieved the desired objectives, won the project, and are here with a prominent growth of 30% financial targets.

As we call it – **The 100 Day Project** is one of our most successful projects in Meezan Bank. Financial reporting was a hassle – handling multiple reports, client details, and financial tracking. Meezan had its hands full with manual work. 360 Degree enabled them to access the luxury to view their entire financial reporting in the palm of their hands. This app automated their financial reporting and brought it on a single platform reducing their human dependency, and the margin of error improved efficiency and enabled them to conveniently track and monitor their financial numbers.

◀ 2018

▲ 2019

# SUCCESS STORY

**Meezan Bank**  
The Premier Islamic Bank

With Covid-19 at its peak, many banks had employees working from home. Agents could not communicate with the clients with their official numbers which created trust issues and barriers between the bank and the clients.

UHF Solution's Calling App helped the bank agents to call and communicate with the clients via Meezan Bank's official landline number and that too, from the comfort of their own homes.

▲ 2020

# SUCCESS STORY

**Meezan Bank**  
The Premier Islamic Bank

**4 projects were awarded to us simultaneously that were successfully deployed.**

Personal Banker App  
Relationship managers had to make a ton of manual efforts to get the results they desired and this solution can minimize their efforts by automating the tasks. It helped maintain track records, automate reporting, and reduce the risk of error. With the time saved, they can now work on the analytical tasks to improve their overall performance.

## **Falcon Plus – Survey Management Tool**

Managing the quality assurance of every branch was a bit challenging. UHF Solutions introduced Falcon Plus a survey management tool that helped operatives conveniently survey every branch and ensure their quality is maintained. This helped Meezan Bank enhance its quality assurance and result in better outcomes.

◀ 2021-22 ▶

# SUCCESS STORY

**Meezan Bank**  
The Premier Islamic Bank

## Email CRM

With the massive number of emails barging in every day it was difficult for operatives to manage, prioritize and reply to those queries timely. UHF Solutions introduced an Email CRM for Meezan Bank that helped them prioritize and manage emails with respect to trend analysis and sentiment analysis. This solution will help them prioritize important emails and respond to them timely.

## INFOSEC – ISMS

Being a large enterprise, it was challenging for Meezan Bank to manage all the information manually. Managing information pertaining to the observations and vulnerabilities in projects, systems, and ATMs was being managed manually with high human dependency and high risk of error. The solution helped them with data management, tracking, and traceability, and ultimately result in achieving their desired outcomes.

◀ 2021-22 ▶

**All the above-mentioned projects were highly successful and within the span of 3 years. As Meezan Bank partnered with UHF Solutions, they have doubled their deposit, effectively and we wear that badge with honor!**

We are proud to be one of their top vendors and are looking forward to continue this relationship and build a longer success story with them.
